SUMMARY TECHNICAL REPORT

9700 Vol. 1. The preparation and testing of explosives, edited by A. H. Blatt. Washington, D. C., 1946. 185p. Contents.--Chapter 1. Preparation of high explosives.--Chapter 2. The properties of high explosives.--Chapter 3. Applications of high explosives.--Chapter 4. Experimental studies of explosive phenomena.--Chapter 5. The theory of the detonation process.--Chapter 6. Propellants.--Chapter 7. Tracers and igniters. C

AMERICAN AIRCRAFT ASSOCIATION, Dayton, Ohio OEMsr-1216
Project OD-14.

9701 Grain type jet motor: design and development; final report by I. Edward Bando. July 18, 1945. C

9702 Design of the grain type jet motor; progress reports by C. W. Wilson. [Mar. 15]-June 15, 1944. C

9703 Development of motors for large grains of composite propellant, by C. W. Wilson. [Apr. 15, May 15 and June 15, 1944] C

CALIFORNIA INSTITUTE OF TECHNOLOGY, Pasadena, Calif. OEMsr-881
Projects NO-33, NO-274, OD-01, OD-05, OD-12, OD-14, OD-15, OD-44, OD-158.

9704 Absorption spectra of explosives and other compounds of interest in the study of smokeless powder; [final report] by Rene Scott Mills and Philip E. Wilcox. Oct. 30, 1945. OSRD 5953.

9706 Changes in the percentages of diphenylamine in single and double base powders which had been subjected to vacuum stability tests at 110°, 100°, 90°, and 80°C; [final report] by Jerry Donohue. Nov. 28, 1945. OSRD-5957. C

9707 A chromatographic investigation of the impurities in certain samples of commercial EDX; [final report] by Earl W. Malmberg. Nov. 17, 1945. OSRD 5944 C

9709 Chromatographic studies of smokeless powder and related substances, II; [final report] by Robert B. Cercey and Walter A. Schroeder. Dec. 6, 1944. OSRD 4431. C

9710 Compositions of gases evolved by smokeless powders in vacuo at elevated temperatures; [final report] by Victor Schocken. Nov. 16, 1945. OSRD 5956.

DIVISION 8

A CATALOG OF OSRD REPORTS

- | | | | |
|------|---|------|---|
| 9711 | Critical evaluation of results of the application of the vacuum stability test to smokeless powder; [final report] by Jerry Donohue and William N. Lipscomb, jr. Dec. 6, 1945. OSRD 5963. C | 9718 | Investigations of captured Japanese propellants; [final report] by Garman Harbottle, Richard M. Noyes and David P. Shoemaker. Nov 13, 1945. OSRD 5971. C |
| 9712 | Decrease of stabilizer in powders containing RDX during storage at elevated temperatures; [final report] by Richard M. Lemmon. Nov. 13, 1945. OSRD 5945. C | 9720 | Investigations of the linear burning rates of propellant powders of various compositions; [final report] by Stanley C. Burket. Dec. 6, 1945. OSRD 5972. C |
| 9713 | The effect of changes in composition on the stability of trench mortar increments; [final report] by Kenneth N. Trueblood. Mar. 17, 1945. OSRD 4821. C | 9721 | A laboratory for the preparation of small batches of solventless double base powder; [final report] by A. O. Dekker. Nov. 14, 1945. OSRD 5947. C |
| 9714 | The effect of variations in composition on the stability of ballistite; [final report] by Kenneth N. Trueblood. Aug. 7, 1945. OSRD-5418. C | 9722 | A magazine of new design for conducting 65.5°C. surveillance tests on smokeless powders; [final report] by Austin L. Wahrhaftig. Nov. 23, 1945. OSRD 5962. C |
| 9716 | An investigation of the possible correlation of changes in color with the condition and stability of certain production lots of stick powder; [final report] by Jerry Donohue. Sept. 28, 1945. OSRD 5533. C | 9723 | Measurements of pH on smokeless powders; [final report] by John W. Otves and David P. Shoemaker. Nov. 28, 1945. OSRD 5968. C |
| 9717 | An investigation of the propellant taken from a captured 21-cm. German rocket; [final report] by David P. Shoemaker. Dec. 6, 1945. OSRD 5973. C | 9725 | A new apparatus for studying the stability of smokeless powders. A highly-modified form of the Taliani test; [final report] by Victor Schocken. Nov. 16, 1945. OSRD 5961. C |

A CATALOG OF OSRD REPORTS

DIVISION 8

- | | | | |
|------|--|------|---|
| 9726 | A nomogram for calculation of results of vacuum stability tests; [final report] by Jerry Donohue and Fred Ordway. Oct. 19, 1945. OSRD-5964. C | 9733 | Stabilization of smokeless powder by diphenylamine. I. Transformation products of diphenylamine in double base powder; [final report] by W. A. Schroeder. Nov. 29, 1945. OSRD 5965. R |
| 9727 | The preparation and plastic properties of small batches of double base powders containing nitro esters of maleic acid; [final report] by Earl O. Wilson. Dec. 1, 1944. OSRD 4430. C | 9734 | Stabilization of smokeless powder by diphenylamine. II. Transformation products of diphenylamine in FNH and pyro powder; [final report] by Laura L. Fong. Nov. 13, 1945. OSRD 5966. C |
| 9728 | Preparation and properties of rolled sheet powders containing DINA and other explosive plasticizers; [final report] by Stanley C. Burket and A. O. Dekker. Aug. 1, 1945. OSRD 5466. C | 9735 | Studies on the condition and stability of 7/8-inch stick powder containing 100 percent rework; [final report] by Jerry Donohue. Sept. 21, 1945. OSRD 5969. C |
| 9729 | Procedures for the analysis of EJA powders; [final report] by Richard M. Noyes and W. A. Schroeder. Jan. 24, 1945. OSRD 4581. C | 9736 | X-ray diffraction studies of constituents of explosives; [final report] by Richard M. Noyes and Maryellin Kates. Nov. 14, 1945. OSRD 5951. C |
| 9731 | A proposed device for indicating the condition of the propellant charge in rocket motors on shipboard or in the field; [final report] by Jerry Donohue. Nov. 13, 1945. OSRD 5958. C | 9737 | The chromatographic investigation of samples from Dana, Indiana, and from Kingsport, Tennessee, by Robert B. Corey. July 26, 1944. C |
| 9732 | The relationship between the quantities of "total", "available", and "actual" diphenylamine in smokeless powders; [final report] by Allan L. Grossberg and Richard M. Noyes. Nov. 13, 1945. OSRD 5948. C | 9738 | Chromatographic studies of RDX and related substances, by Linus Pauling, R. B. Corey, A. L. LeRosen and Earl Malmberg. Apr.-Sept. 1944. C |
| | | 9739 | A chromatographic study of RDX and related substances, by Earl W. Malmberg. Nov. 13, 1945. OSRD 5943. C |

DIVISION 8

A CATALOG OF OSRD REPORTS

- | | | | |
|------|--|------|---|
| 9740 | The chromatography of cyclonite oxide, by Robert B. Corey. Aug. 1, 1944. C | 9749 | Rocket and rocket propellant development in Germany, by Robert A. Cooley. May 1945. C |
| 9741 | The chromatography of some compounds related to RDX, by Robert B. Corey. July 25, 1944. C | 9750 | Some experiments dealing with the effect of carbon black and nigrosine on the stability of ballistite, by E. O. Wilson. May 15, 1944. OSRD 3783. C |
| 9742 | Development of a vacuum stability test for double base powders; progress reports 1-2 by William N. Lipscomb, jr. May 30 and Oct. 18, 1945. OSRD nos. 5149, 5954. C | 9751 | Stabilization of smokeless powder by ethyl centralite. I. Transformation products of ethyl centralite in double base powder, by Kenneth N. Trueblood. Oct. 30, 1945. OSRD 5967. R |
| 9746 | Investigations of captured German propellants, by William N. Lipscomb, jr. and Richard M. Noyes. Oct. 2, 1945. OSRD 5970. C | 9752 | Studies of the effect of various salts on the vacuum stability behavior of solventless double base powders, by Philip Hayward. Nov. 13, 1945. OSRD 5960. C |
| 9747 | Investigations of double base powder, Ordnance Department Program OD-158; monthly progress report nos. 3-5 by Robert B. Corey and Gladys E. Acevedo. July 15, Aug. 15 and Sept. 15, 1944. C | 9753 | Studies relating to the stability of pilot lots of rocket propellant powders, by Josephine Bonner and John W. Otvos. Nov. 28, 1945. OSRD 5955. C |
| 9748 | Investigations of double base powders; formal monthly reports by Linus Pauling, Robert B. Corey, Gladys E. Acevedo, Joan M. Bateman, Olga M. Hoben and William N. Lipscomb, jr. Jan. 1943-Aug. 1945. Abstracts, by Linus Pauling. [Sept. 15, 1944-Aug. 15, 1945] Informal monthly reports, by Linus Pauling and Robert B. Corey. [Mar. 15, 1943-Jan. 15, 1945] C | 9754 | Vacuum stability tests on experimental powders containing manganese dioxide, by David P. Shoemaker and Jerry Donohue. Apr. 23, 1945. OSRD 4970. C |
| | | 9755 | Vacuum stability tests on experimental powders containing phthalide, by David P. Shoemaker. Apr. 23, 1945. OSRD 4971. C |

DIVISION 8

9756 Vacuum stability tests on solventless double base powders containing various stabilizers, by Philip Hayward. Nov. 20, 1945. OSRD 5959. C

9757 X-ray studies of compounds related to RDX, by Robert B. Corey. July 14, 1944. C

CARNEGIE INSTITUTE OF TECHNOLOGY,
Pittsburgh, Pa. OEMsr-11
Project OD-04.

9758 Beeswax substitutes for phlegmatization of cyclonite; progress report by D. P. MacDougall. Jan. 10, 1942. B-150. OSRD 313. C

9759 Beeswax substitutes for phlegmatization of cyclonite; progress report no. 2 by D. P. MacDougall. Feb. 23, 1942. B-187. OSRD 397. R

CARNEGIE INSTITUTE OF TECHNOLOGY,
Pittsburgh, Pa. OEMsr-202
Projects AC-75, AN-1, CE-32, NO-B10, NO-E38, NO-B40, NO-99, NO-110, NO-144, NO-151, NO-167, NO-199, NO-201, NO-211, NO-212, NO-213, NO-231, NO-232, NS-125, NS-309, OD-01, OD-02, OD-03, OD-04, OD-05, OD-14, OD-31, OD-58, OD-103, OD-152, SC-41, SOS-10. See also Division 2, Carnegie Institute of Technology, OEMsr-950; Division 3, George Washington University, OEMsr-273; Division 8, Carnegie Institute of Technology, OEMsr-11; E. I. du Pont de Nemours and Company, Inc., OEMsr-828; and Monsanto Chemical Company, OEMsr-639.

9760 Closed bomb burning of high explosives and propellants; final report by S. J. Jacobs and W. B. Buck. Jan. 22, 1946. OSRD 6329. C

9761 Extrusion of ballistite at the ERL; final report by J. E. Ablard. Aug. 11, 1944. OSRD 4007. C

9763 Microwave tube destruction; final report by M. A. Paul. Aug. 20, 1943. OSRD 1723. C

9764 The preparation and properties of cast double base propellants; final report by B. P. Dailey, J. F. Kincaid and H. M. Shuey. Jan. 15, 1946. OSRD 5577. C

9765 Study of the British continuous tetryl process; final report by R. C. Elderfield. June 25, 1942. B-278. OSRD 661. C

9766 The techniques of preparation of solvent extruded composite propellants; final report by T. F. Anderson. Jan. 15, 1946. OSRD-5579. C

9767 Underwater penetration by small-scale shaped charges; final report by E. P. Meibohm and M. A. Paul. Oct. 24, 1945. OSRD 5569. C

9768 The action of cavity charges, by D. P. MacDougall. Mar. 29, 1943. Abstract of OSRD 1338. C

- | | | | |
|------|---|------|--|
| 9769 | Adiabatic ignition; progress report by F. H. Westheimer. Feb. 28, 1945. OSRD 4758. C | 9778 | Cast perchlorate propellants based on thermosetting high polymers; progress report by H. F. Hardman and G. B. DeLaMater. Dec. 19, 1945. OSRD 5582. C |
| 9771 | The application of flash photography to the study of explosion phenomena; progress report by E. M. Boggs, R. J. Brumbaugh and G. H. Messerly. Jan. 28, 1946. OSRD 5616. C | 9779 | Chemical stability research, by Russell McGill. [Dec. 15, 1942] C |
| 9772 | Ballistic properties of Composite Propellants 404 and 492; progress report by R. W. Broge. May 9, 1945. OSRD 5043. C | 9780 | Chemical stability testing and analysis, by Russell McGill. [Sept. 15, 1942] C |
| 9773 | "Beano" spherical grenade, by D. P. MacDougall, L. H. Farinholt, E. H. Eyster, A. A. Layton and L. Goodman. [Nov. 15, 1943-Aug. 15, 1944] C | 9782 | Comments on the talks by Dr. C. O. Davis and Dr. M. A. Cook at the Technical Meeting of the Joint Committee on Shaped Charges, March 29, 1943, by J. G. Kirkwood, G. B. Kistiakowsky, D. P. MacDougall, G. H. Messerly and M. A. Paul. C |
| 9774 | Beeswax substitutes for phlegmatization of cyclonite; progress report no. 3 by D. P. MacDougall. Apr. 4, 1942. B-218. OSRD 486. C | 9783 | A comparison of cyclotol, pentolite and ednatol. Memorandum, by D. P. MacDougall. Mar. 8, 1943. Progress report, by E. H. Eyster and M. A. Paul. Apr. 24, 1943. OSRD 1364. C |
| 9775 | Behavior of the jet from a cavity charge, by D. P. MacDougall, G. H. Messerly and M. A. Paul. June 21, 1943. C | 9784 | A comparison of Dithexite and 35-65 benzene-nitrogen tetroxide, by D. P. MacDougall. Jan. 13, 1942. C |
| 9777 | Bullet impact tests of demolition packs and reinforced detonating cord; progress report by William H. Rogers, jr. Jan. 18, 1946. OSRD 5747. C | 9785 | Composition B (Cyclotol); progress report by Eugene H. Eyster and M. A. Paul. Jan. 29, 1943. OSRD 1167. C |

A CATALOG OF OSRD REPORTS

DIVISION 8

9786	The compression strength of composite propellants; progress report by F. A. Long. Aug. 31, 1943. OSRD 1758. C	9793	Design of a pilot plant for the production of cast perchlorate propellant; progress report by J. E. Ablard. Nov 8, 1945. OSRD 5584. C
9787	Compression strength of grains of composite propellant 218-B prepared at the Monsanto pilot plant; progress report by F. A. Long. Jan. 1, 1943. OSRD 3076. C	9794	The design of explosive streamers; progress report by J. H. Lum and J. K. Bragg. May 5, 1943. OSRD-1382. C
9788	Construction and operation of the rotating mirror camera; progress report by S. J. Jacobs. Jan. 2, 1946. OSRD 5614. C	9796	Determination of water in RDX and Composition B; progress report by Eugene H. Eyster and M. A. Paul. Mar. 2, 1943. OSRD 1234. C
9789	Controlled fragmentation, by D. P. MacDougall. [Oct. 15, 1942] C	9798	The development and properties of large, long burning grains of composite propellants; progress report by F. A. Long. Mar. 7, 1944. OSRD 3325. C
9790	Controlled fragmentation of high-capacity munitions, by D. P. MacDougall, E. H. Eyster and A. A. Layton. [Apr. 15-Oct. 15, 1944] C	9799	Development and testing of composite rocket propellants; progress report by Louis P. Hammett. Sept. 7, 1942. B-354. OSRD 857. C
9791	Controlled fragmentation of thin cased munitions; progress report by Eugene H. Eyster. Jan. 15, 1946. OSRD-5630. C	9800	Development and testing of composite rocket propellants; progress reports by Louis P. Hammett and F. A. Long. [Sept. 15, 1942-Apr. 15, 1944] C
9792	Dependence of fragment velocity and fragment penetration on charge-weight ratio of shells; progress report by R. W. Drake. Dec. 21, 1945. OSRD 5621. R	9801	Development and testing of large charges for special jet propulsion devices, by F. A. Long and J. E. Ablard. [Jan. 15-Aug. 15, 1945] C

- 9830 Flash photography of cased charges, by D. P. MacDougall and G. H. Messerly. [Sept. 15, 1943-Mar 15, 1944] C
- 9831 The flash photography of detonating explosives; progress report by G. H. Messerly. June 3, 1943. OSRD 1488. C
- 9832 The flow and friction properties of composite propellant 218 and similar compositions; progress report by Walter Kauzmann. Feb. 14, 1944. OSRD 3281. C
- 9833 The formation of methane during the cooling of powder gases in a closed bomb, by J. F. Kincaid. [Feb. 15, 1943] C
- 9834 Fragment velocity and fragmentation of 3"/50 (Mk. 27 Mod. 3) A.A. shell loaded with TNT and with Composition A3 and cavitized for Mk. 45, Mk. 54 and Mk. 58 fuzes, by R. W. Drake. June 26, 27 and Sept. 4, 1945. OSRD nos. 5266, 5267, 5531. Title varies. C
- 9835 Fragment velocity and fragmentation of 3"/50 Mk. 29 Mod. 3 AP shell, loaded with Composition A3 and Explosive D, by R. W. Drake. June 15, 1945. OSRD 5213. C
- 9836 Fragment velocity and panel penetration. A comparison of Haleite and Ednatol with service filling; progress reports by R. W. Drake. Part I. 37 mm. M63, 3" M42A1 and 90 mm. M71 projectiles. Oct. 30, 1943. OSRD 1964. Part II. 40 mm. Mk. II T/L/ Projectiles. Oct. 30, 1943. OSRD 1965. Part III. 90 mm. M71E2 projectiles. Nov. 29, 1943. OSRD 2071. Part IV. 75 mm. M48 and M48E2 projectiles. Dec. 18, 1943. OSRD 3022. Part V. M49A2 60 mm. mortar shell. Jan. 3, 1944. OSRD 3079. Part VI. M54 37 mm. projectile. Jan. 3, 1944. OSRD 3079. Part VII. 20 mm. Mk. I. H.E.I. projectiles. Oct. 3, 1945. OSRD 5572. C
- 9837 Fragment velocity and panel penetration - M71 90 mm. shell, TNT loaded; fuse fragments, base fragments, nose-wall fragments; progress report by R. W. Drake. Oct. 3, 1945. OSRD 5571. Supplement to OSRD 1964. C
- 9839 Fragment velocity camera, by D. P. MacDougall. [Sept. 15, 1942] C
- 9840 Fragment velocity retardation, target penetration and mass distribution, by D. P. MacDougall, R. W. Drake and G. H. Messerly. [June 15, 1944-Mar. 15, 1945] C
- 9842 I. Further experimental work on nozzles for experimental testing of solid propellants. II. Motors for routine testing of rocket propellants; progress report by L. Axelrod. Jan. 17, 1946. OSRD 5583. C

A CATALOG OF OSRD REPORTS

DIVISION 8

- | | | | |
|------|--|------|--|
| 9843 | The gas evolution from DBX; progress report by Amos Turk and Earl Hellerstein. Feb. 19, 1945. OSRD 4715. C | 9850 | Improvements in the performance of cavity charges; progress report by M. A. Paul and J. F. Lemons. Apr. 3, 1944. OSRD 3443. C |
| 9844 | The gas evolution from Minol; progress report by John W. Dawson and F. H. Westheimer. Nov. 8, 1945. OSRD 5595. C | 9852 | Index to N.D.R.C. interim reports and progress reports on shaped charges, by M. A. Paul. [Aug. 15, 1944] C |
| 9845 | The gas evolution from TNT-Aluminum; progress report by Amos Turk. Nov. 14, 1944. OSRD 4339. C | 9853 | Inhibiting flash in guns, by J. F. Kincaid. [Apr 15, 1943] C |
| 9846 | The gas evolution from Torpex; progress report by F. H. Westheimer and John W. Dawson. Sept. 1, 1944. OSRD 4085. C | 9854 | Inhibition of nitroglycerin diffusion in coatings for restricting burning of rocket propellants; progress report by Rufus W. Lumry. Nov. 5, 1943. OSRD 1995. C |
| 9847 | The grinding, classification, and particle size control of crystalline ingredients for solvent-extruded composite propellants; progress report by R. C. C. St. George, jr. Oct. 24, 1945. OSRD 5578. C | 9855 | Initiation of detonation in TNT, by D. P. MacDougall. [194-] C |
| 9848 | Heats of combustion, heats of explosion, and burning rates of ammonium picrate-potassium nitrate composite propellants; progress report by R. W. Broge. Nov. 15, 1945. OSRD 5585. C | 9857 | Initiation studies on solid explosives; progress report by Elizabeth M. Boggs, G. H. Messerly and H. A. Strecker. Dec. 14, 1945. OSRD 5617. C |
| 9849 | High desensitized cast explosives; progress report by Eugene H. Eyster. Jan. 22, 1946. OSRD 5628. C | 9858 | Introduction to explosives, by George B. Kistiakowsky. Aug. 2, 1945 OSRD 5401. C |
| | | 9859 | Investigation on cast double base propellants, by F. H. Westheimer. [Feb. 15-Aug. 15, 1945] Aging effect, by E. Specht and E. Hellerstein. [Apr. 15 1945] Studies on various types of casting powder, by E. Specht and E. Hellerstein. [Mar. 15, 1945] C |

DIVISION 3

A CATALOG OF OSRD REPORTS

9860	Investigations on castable perchlorate propellants; preliminary report. Jan. 10, 1945. C	9869	Methods of physical testing; progress report no. 1 by Duncan P. MacDougall. Aug. 11, 1942. B-307. OSRD 804. C
9861	Kinetics of decomposition of various explosives; progress report by Hyman Henkin. July 4, 1944. OSRD 3856. C	9871	Microwave tube destruction; progress reports by Duncan P. MacDougall and M. A. Paul. Dec. 9, 1942 and Mar. 23, 1943. B-460. OSRD nos. 1122, 1287. C
9862	Mark 29 device, by D. P. MacDougall. [Dec. 15, 1942 and Feb. 15, 1943] C	9872	Momentum and kinetic energy of the shaped charge jet; progress report by M. A. Paul and J. F. Lemons. Oct. 23, 1945. OSRD 5570. C
9864	Measurement of underwater explosion pressures II; progress report by E. B. Wilson, jr. July 21, 1942. B-301. OSRD 753. C	9873	Optical studies of coned charges, by D. P. MacDougall. [Sept. 15, 1942] C
9865	The mechanism of action of cavity charges; progress report by George B. Kistiakowsky, Duncan P. MacDougall and G. H. Messerly. Apr. 12, 1943. OSRD 1338. C	9874	Optical studies of detonation rates, by D. P. MacDougall and G. H. Messerly. [Oct. 15, 1942-Aug. 15, 1943] C
9866	The mechanism of the formation of RDX; progress report by F. H. Westheimer and Edward Segel. May 15, 1944. C	9875	Optical studies of detonations, by D. P. MacDougall and G. H. Messerly. [Oct. 15, 1943-June 15, 1945] The detonation velocity of TNT, by M. Hurwitz and H. A. Strecker. [June 15, 1945] The nature of the radiation emitted by detonating explosives, by S. J. Jacobs, T. P. Cotter and R. J. Brumbaugh. [May 15, 1945] Rate of detonation studies with the rotating drum camera, by A. Evernden, W. K. Hall, M. D. Hurwitz and G. Downey. [May 15, June 15 and July 15, 1944] C
9867	Method of loading tracers, by L. P. Hammett and F. A. Long. [June 15-Sept. 15, 1943] C		
9868	A method of measuring impact strengths, by Robert H. Kalenberger. May 22, 1945. C		

CONFIDENTIAL

- | | | | |
|------|--|------|---|
| 9876 | Optical studies of strong shock waves; progress report by Elizabeth M. Boggs and M. D. Hurwitz. Jan. 15, 1946. OSRD 5613. C | 9885 | Physical testing of explosives, by D. P. MacDougall. [Oct. 15, 1942] C |
| 9878 | Panel fragmentation trials of various 81 mm. mortar shells; progress report by R. W. Drake. Dec. 3, 1945. OSRD 5620. R | 9886 | Physical testing of explosives; progress reports by Eugene H. Eyster, William H. Rogers, jr., R. F. Davis and L. C. Smith. Part I. The sensitivity of explosives to bullet impact. Nov. 20, 1945. OSRD 5745. Part II. Sensitivity studies with the drop-weight impact machine. Dec. 27, 1945. OSRD 5744. Part III. Miscellaneous sensitivity tests; performance tests. Dec. 27, 1945. OSRD 5746. C |
| 9879 | Penetration of steel targets by linear charges; progress report by M. A. Paul. May 4, 1943. OSRD 1383. C | 9887 | Pit fragmentation studies, by J. F. Lemons and W. K. Hall. Composition A compared with service loadings in 3"/50 A.P. and A.A. projectiles. [May 15 and June 15, 1945] Evaluation of TNT-D2 and Picratol in comparison with TNT. [July 15, 1945] Explosive D and Composition A in the Navy Mk. 29-2 3" A.P. projectile. [Apr. 15, 1945] Mk. 31-1 3" A.A. projectile with Mk. 58 fuze. [Aug. 15, 1945] C |
| 9880 | Penetration of steel targets in air by small-scale cavity charges; progress report by M. A. Paul. Sept. 29, 1943. OSRD 1861. C | 9888 | Point-initiating fuzes for shaped charge weapons; progress report by J. F. Lemons and M. A. Paul. Jan. 3, 1946. OSRD 5601. C |
| 9881 | PEP-2 (PETN plastic explosive); progress report by Eugene H. Eyster and M. A. Paul. Feb. 11, 1944. OSRD-3240. C | 9889 | The preparation and properties of experimental powders, by J. F. Kincaid, B. P. Dailey, R. H. Kallenberger and F. H. Westheimer. [June 15, 1943-Aug. 15, 1945] C |
| 9882 | Phlegmatization of RDX, by D. P. MacDougall. [Sept. 15, 1942] C | | |
| 9883 | The physical properties of smokeless powder, by J. F. Kincaid. [Feb. 15, 1943] C | | |
| 9884 | Physical testing, by D. P. MacDougall, E. H. Eyster and M. A. Paul. [Jan. 15, 1943-July 15, 1945] C | | |

- | | |
|--|---|
| <p>9890 Preparation and properties of explosives, by James Cason and Russell McGill. [Oct. 15, 1942-Feb. 15, 1944] Preparation of cyclo tetramethylenetetranitramine (HMX); monthly summary report by John W. Dawson, Russell McGill and Amos Turk. Aug. 15, 1943. C</p> | <p>9898 Preparation of explosives, by Russell McGill. [Sept. 15, 1942] C</p> |
| <p>9891 Preparation and properties of Fivonite; progress report by Amos Turk. Sept. 3, 1943. OSRD 1767. C</p> | <p>9899 Preparation of HMX, by Russell McGill. [Dec. 15, 1942 and Jan. 15, 1943] C</p> |
| <p>9892 The preparation and properties of plastic high explosives; progress report by Eugene H. Eyster. Jan. 15, 1946 OSRD 5631. C</p> | <p>9900 Preparation of plastic explosive, by D. P. MacDougall. [194-] C</p> |
| <p>9894 The preparation and properties of solvent extruded composite propellants, by L. P. Hammett, J. F. Kincaid, B. P. Dailey, E. E. Mendenhall and G. G. Parkinson. [Sept. 15, 1943-Dec. 15, 1944] C</p> | <p>9901 The properties and applications of EJ powders; progress report by R. A. Ruehrwein, Rufus W. Lumry and J. F. Kincaid. Sept. 5, 1944. OSRD 4053. C</p> |
| <p>9895 The preparation and properties of solvent extruded composite propellants; progress report by G. G. Parkinson, B. P. Dailey and J. F. Kincaid. Jan. 17, 1946. OSRD 5576. C</p> | <p>9902 Purge pellet work at the Explosives Laboratory; progress report by F. A. Long. Jan. 27, 1944. OSRD 3184. R</p> |
| <p>9896 Preparation and testing of dry extruded rocket propellants, by J. E. Ablard. [May 15 and July 15, 1944] C</p> | <p>9903 The radiography of explosive materials; progress report by O. E. A. Bolduan. Nov. 5, 1945. OSRD 5575. C</p> |
| <p>9897 The preparation of experimental powders, by J. F. Kincaid. [Mar. 15 and May 15, 1943] C</p> | <p>9904 The rate of burning of a self-combustible material, by Walter Kauzrann. [194-] C</p> |
| | <p>9905 The rate of detonation of various explosive compounds; progress reports by G. H. Messerly and M. D. Hurwitz. Feb. 22, 1943 and Jan. 15, 1946. OSRD nos. 1219, 5611. Title varies. C</p> |
| | <p>9907 Rates of burning of high explosives, by D. P. MacDougall. [Aug. 15, 1943] C</p> |

A CATALOG OF OSRD REPORTS

DIVISION 8

9908	Rates of burning of propellants, by J. F. Kincaid. [July 15, 1943] C	9917	The sensitivity of various General Purpose Bombs and simulated rocket motors to projectile impact; progress report by William H. Rogers, jr. and Eugene H. Eyster. May 2, 1945. OSRD 5024. C
9909	Rates of deflagration of high explosives, by D. P. MacDougall. [Sept. 15, 1942] C	9918	The sensitivity to bullet impact of aerial depth bombs loaded with TNT and with various HBX's; progress report by William H. Rogers, jr. and Eugene H. Eyster. Jan. 15, 1946. OSRD 5748. C
9910	RDX compositions, by D. P. MacDougall. [Dec. 15, 1942-May 15, 1943] C	9919	The separation of liquid from propellants, by H. Salwin. Cycling experiments. [Mar. 15, 1945] The separation of liquid in 78° surveillance. [Dec. 15, 1944 and Jan. 15, 1945] C
9911	Research on special gun propellants, by J. F. Kincaid. [Sept. 15, 1942] C	9920	The separation of nitroglycerine from double base powders; progress reports by F. H. Westheimer. Preliminary literature survey, Mar. 9, 1945. OSRD 4791. Revised literature survey, Nov. 1, 1945. OSRD 5591. C
9912	Rifle bullet tests on composite propellant 218B and on ballistite; progress report by Henry Posner, jr. Aug. 12, 1943. OSRD 1706. C	9921	Shaped charge bombs; progress report by J. F. Lemons, E. J. Huber and M. A. Paul. Dec. 20, 1945. OSRD 5600. C
9913	A rotating drum camera for the optical study of detonations; progress report by G. H. Messerly. July 8, 1942. B-285. OSRD 682. C	9922	Shaped charge boosters; progress report by Leon Goodman. Dec. 26, 1945. OSRD 5629. C
9914	The screw extrusion of composite propellants; progress report by Walter Kauzmann. Feb. 14, 1944. OSRD 3282. C	9923	Shaped detonation waves; progress report by S. J. Jacobs and Robert J. Grabenstetter. Jan. 28, 1946. OSRD 5603. C
9915	Semi-explosive plasticizers for flashless propellants, by F. H. Westheimer. [Oct. 15, 1944-Jan. 15, 1945] C		
9916	Sensitivity and power tests, by D. P. MacDougall. [Sept. 15, 1942] C		

- | | |
|--|---|
| <p>9924 Shock wave studies with the rotating drum camera, by D. P. MacDougall, E. M. Boggs, G. H. Messerly, W. K. Hall and M. D. Hurwitz. [May 15, June 15 and July 15, 1944] Shock wave velocity and pressure from spherical charges of Torpex II. [Mar. 15, 1945] Shock wave velocity and pressure off a spherical charge. [Aug. 15, 1944] C</p> <p>9926 Specific impulse and burning rates of composite propellant 218-B and 218; progress report by Charles G. Sage. July 20, 1943. OSRD 1627. C</p> <p>9927 Specifications of the physical properties of desensitizing waxes for use in explosives; progress report by Eugene H. Eyster. Jan. 2, 1946. OSRD 5633. C</p> <p>9929 Stability of PETN and Pentolite, by James Cason and Russell McGill. [Oct. 15, 1942-Nov. 15, 1943] C</p> <p>9931 Stability research, by Russell McGill. [Jan. 15, 1943] C</p> <p>9932 The state of explosion product gases deduced from flash photographs of expanding shell cases, by D. P. MacDougall, E. M. Boggs and G. H. Messerly. [Dec. 15, 1943 and Jan. 15, 1944] C</p> | <p>9933 Steel target penetration in air by small-scale cavity charges; progress report no. 2 by E. J. Huber, J. F. Lemons and M. A. Paul. Jan. 15, 1946. OSRD 5604. C</p> <p>9934 Studies of a shaped charge assisted S.A.P. bomb; progress report by L. Paul Saxer. Jan. 18, 1946. OSRD-5605. C</p> <p>9935 Studies of shaped charges, by D. P. MacDougall, M. A. Paul, E. H. Eyster and G. H. Messerly. [Oct. 15, 1942-Aug. 15, 1945] C</p> <p>9936 Studies of shaped charges with the rotating drum camera; progress report by M. D. Hurwitz and H. A. Streck-er. Jan. 15, 1946. OSRD-5615. C</p> <p>9937 Studies of shell fragment mass distribution; progress reports by M. A. Paul and W. K. Hall. Part I. Navy 3"/50 A.A. projectiles, Mk. 27-3 and Mk. 31-1. Jan. 5, 1946. OSRD 5607. Part II. The Mk. 29-2 3"/50 A.P. projectile with Explosive D and with Composition A-3. Jan. 28, 1946. OSRD 5606. C</p> <p>9938 Studies of shell fragment mass distribution. Part III. Effect of booster size in the Mk. 27-3 3"/50 A.A. projectile loaded with cast TNT; progress report by M. A. Paul and W. K. Hall. Jan. 22, 1946. OSRD 5608. R</p> <p>9939 Studies of shell fragmentation, by D. P. MacDougall, R. W. Drake and G. H. Messerly. [Nov. 15, 1942-Aug. 15, 1945] C</p> |
|--|---|

- | | |
|---|---|
| <p>9940 Studies of the desensitization of Torpex-2 and of the sensitivity of HBX; progress report by Eugene H. Eyster. Jan. 2, 1946. OSRD 5743. C</p> <p>9941 Studies of the preparation, stabilization and testing of explosives, by F. H. Westheimer. [Mar. 15, 1944-Aug. 15, 1945] C</p> <p>9942 Studies of the sensitivity of explosives to bullet impact; progress report by E. H. Eyster and W. H. Rogers. Dec. 15, 1943. OSRD 3149. C</p> <p>9943 Studies of the stability of propellants, by F. H. Westheimer. [June 15, July 15 and Aug. 15, 1945] C</p> <p>9946 Study of ethyltrimethylolmethane trinitrate (EMMET), by James Cason. [Oct. 15, 1942] C</p> <p>9947 Study of RDX compositions, by D. P. MacDougall. [Oct. 15 and Nov. 15, 1942] C</p> <p>9948 Study of tetramethylolcyclopentanone tetranitrate (Fivonite), by James Cason. [Oct. 15, 1942] C</p> <p>9949 Substitutes for Albarite; progress report by F. H. Westheimer and R. H. Kallenberger. Dec. 5, 1945. OSRD 5592. C</p> | <p>9950 Surveillance of high explosives; progress report by Harold Salwin and F. H. Westheimer. Nov. 8, 1945. OSRD 5596. C</p> <p>9951 Surveillance of propellants; progress report by F. H. Westheimer and Harold Salwin. Oct. 30, 1945. OSRD-5594. C</p> <p>9952 Surveillance testing of high explosives; progress report by Hyman Henkin. Oct. 23, 1943. OSRD 1947. C</p> <p>9953 Surveillance testing of propellant explosives; progress report by Hyman Henkin. Sept. 5, 1944. OSRD 4103. C</p> <p>9954 Survey of investigations on new propellants for rockets and other jet propulsion devices, by Louis P. Hammett. Aug. 18, 1945. OSRD 5463. C</p> <p>9955 Target penetration by rotating cavity charges; progress report by M. A. Paul. Nov. 5, 1945. OSRD 5598. C</p> <p>9956 Target penetration by the jet from a rotating cone charge; progress reports by M. A. Paul. Aug. 5, 1943 and July 10, 1944. OSRD nos. 1680, 3874. C</p> |

- | | | | |
|------|---|------|--|
| 9957 | Techniques of preparation of cast double base powder, restrictive container fabrication, and firing of cast double base charges, progress report by H. M. Shuey and R. H. Martin. Dec. 26, 1945. OSRD 5580. C | 9964 | Thermal stability of NH_4NO_3 -nitrocellulose mixtures, by J. F. Kincaid. [Nov. 15, Dec. 15, 1942 and Feb. 15, 1943] C |
| 9958 | Tests of methods of mounting grains of composite propellant 218B in a rocket motor; progress report by Henry Posner, jr. Aug. 12, 1943. OSRD 1708. C | 9965 | Thermochemical computations on propellants, by J. F. Kincaid. [Oct. 15 and Nov. 15, 1942] C |
| 9959 | Tetramethylolcyclopentanone (Fivonite), by Russell McGill. [Dec. 15, 1942] C | 9966 | Thermochemical examination of a number of commercial and experimental propellants, by J. F. Kincaid. [Apr. 15, 1943] C |
| 9960 | Theoretical and experimental studies on the shock wave close to a long detonating cylinder of explosive, by D. P. MacDougall, E. M. Boggs and G. H. Messerly. [Apr. 15, 1944] C | 9970 | Tracer research at the ERL; progress report by Walter Kauzmann. Feb. 14, 1944. OSRD 3283. C |
| 9961 | Theoretical studies of the expanding shell case, by D. P. MacDougall, E. M. Boggs and G. H. Messerly. [Apr. 15 and May 15, 1944] C | 9972 | The use of General Motors capacitance pressure gages for internal ballistics measurements on rocket propellants; progress report by Charles G. Sage. Nov. 1, 1945. OSRD 5750. C |
| 9962 | The theory of adiabatic ignition tests as applied to propellant powders, by F. H. Westheimer. [May 15, 1944] C | 9975 | The viscosity of explosive slurries, progress reports by E. H. Fyster, A. A. Layton and M. A. Paul. Part I. Experimental methods and results. May 22, 1944. OSRD 3663. Part II. Experimental methods; determination of stress-rate curves. Nov. 9, 1945. OSRD 5625. Part III. The improvement of explosive slurries by surface-active agents. Nov. 9, 1945. OSRD 5626. C |
| 9963 | The thermal stability of dicyandiamide and melamine compositions, by J. F. Kincaid. [Feb. 15, 1943] C | | |

A CATALOG OF OSRD REPORTS

DIVISION 8

9976 Waxes for HBX; progress report by F. H. Westheimer. Oct. 3, 1945. OSRD 5573. C

C. F. SERIES (Controlled Fragmentation and Shaped Charges).

9977 Controlled fragmentation and shaped charges; interim reports compiled by [George B. Kistiakowsky] Sept. 15, 1942-Aug. 15, 1943. Report nos. CF-(1-12). C

UNIVERSITY OF CHICAGO, Chicago, Ill. OEMsr-875
Project NO-117.

9981 The kinetics of nitration; progress reports by F. H. Westheimer, Edward Segel and Richard Schramm. Mar. 15-Sept. 15, 1943. C

9983 The oxynitration of benzene; progress reports by F. H. Westheimer, Edward Segel and Richard Schramm. Oct. 15, 1943-Feb. 12, 1944. C

COLUMBIA UNIVERSITY, New York, N. Y. OEMsr-137
Projects NO-B10, NO-B38, NO-99, NO-199, NO-201, OD-01, OD-04, OD-1, OD-7, OD-9, OD-10, OD-58, OD-103, OD-126, OD-127.

9988 I. The vacuum stability and Bergmann-Junk tests as applied to PETN and Pentolite. II. The vacuum stability test as applied to nitramines; final report by Robert C. Elderfield. Aug. 31, 1944. C

9989 [Composition of the "white substance" (WS)] by R. C. Elderfield. [May 3, 1944] C

9990 Controlled decomposition of nitrocellulose, by R. C. Elderfield. [Sept. 15, 1943-June 15, 1944] C

9991 Studies of thermal stability tests, by R. C. Elderfield. [Feb. 15, 1943-May 15, 1944] C

9992 [Work done at Columbia University under contract no. B-126] by R. C. Elderfield, L. S. Birnbaum, A. Myerson, L. F. Halley, D. F. Bongiorno and D. O. Hoffman. Monthly progress reports, Oct. 15, 1941-Nov. 15, 1943. Quarterly report, Apr. 15, 1942. C

COLUMBIA UNIVERSITY, New York, N. Y. OEMsr-224
Projects NO-99, OD-01, OD-4.

9993 Preparation of methylol derivatives from various aldehydes and ketones; final report by Arthur C. Cope and Robert C. Elderfield. [Dec. 1942] C

9995 [Work done at Columbia University under contract no. E-194] progress reports by R. C. Elderfield, L. F. Halley and Arthur C. Cope. Dec. 15, 1941-Nov. 1, 1942 C

COLUMBIA UNIVERSITY, New York,
N. Y. OEMsr-305
Projects OD-9, OD-10.

9997 Work on kinetics of nitra-
tion, by Louis P. Hammett.
Jan. 15-June 15, 1942. C

CORNELL UNIVERSITY, Ithaca, N. Y.
NDCrc-23
Projects CWS-4, OD-5, OD-6,
OD-12.

10000 Preparation of RDX; [final
report] by John R. Johnson.
Oct. 27, 1941. B-97. OSRD-
159. C

CC. WELLS UNIVERSITY, Ithaca, N. Y.
OEMsr-193
Projects NO-B10, NO-135, OD-
5, OD-6, OD-12, OD-109.

10001 The chemistry of DINA and
related compounds; [final
report] by Alfred T. Blom-
quist. May 15, 1945. C

10003 [Investigations carried out
in the Cornell Laboratory]
final report by Alfred T.
Blomquist. Sept 15, 1942. C

10004 Attempted nitrations of oc-
tamethylenetetramine; prog-
ress report by Alfred T.
Blomquist. Apr. 15, 1944. C

10006 Crystal forms and sensitiv-
ity of RDX and HMX; progress
report by John R. Johnson.
Apr. 15, 1942. C

10007 Crystallographic examination
of NENO, by Alfred T. Blom-
quist. Nov. 26, 1943. C

10008 Crystallographic studies of
compounds related to RDX and
HMX; progress reports by
Alfred T. Blomquist. Jan.
15-May 15, 1943. C

10009 Crystallographic studies of
compounds related to RDX and
HMX; progress report by Al-
fred T. Blomquist. Sept.
16, 1943. OSRD 1803. C

10010 Crystallographic studies of
RDX and HMX; progress report
by John R. Johnson. May 15,
1942. C

10011 Crystallographic studies of
RDX and related compounds;
progress reports by John R.
Johnson and Alfred T. Blom-
quist. Mar. 15, 1942 and
Feb. 15, 1943. C

10013 The crystallography of del-
ta-HMX, by A. T. Blomquist.
Nov. 4, 1942. C

10014 The crystallography of eth-
ylenedinitramine (EDNA), by
A. T. Blomquist. [Mar. 15
and May 15, 1943] C

10015 Crystals forms of HMX, by
John R. Johnson. May 14,
1942. C

10016 Examination of chromato-
graphically purified DiPEHN,
by A. T. Blomquist. [Jan.
15, 1944] C

- 10199 High explosives sensitive-
ness investigation; digests
by J. M. Downard, J. E. My-
ers, Walter S. Koski, R. W.
Lawrence, J. G. Fox and M.
A. Kintner. Aug. 7, 1942-
July 6, 1945. Boostering
charge tests. May 4, June 1
and Sept. 7, 1945. Impact
sensitiveness of high explo-
sives. Oct. 2, 1942. Rifle
bullet tests. Oct. 2, 1942-
Sept. 3, 1943. Subtitle
varies. Sensitiveness to
friction. Oct. 2, 1942-July
7, 1944. Subtitle varies.
Sensitiveness to glancing
impact - sliding rod tests.
Feb. 4-July 7, 1944. Sensi-
tiveness to impact. Jan. 1,
1943-May 5, 1944. Sensi-
tiveness to impact and cap
sensitivity. July 7, 1944.
Sensitiveness to rifle bul-
let. Oct. 1, 1943-July 7,
1944. C
- 10200 A method of measuring the
sensitiveness of high explo-
sives to frictional impact;
progress report by J. G.
Fox. Jan. 27, 1944. OSRD-
3185. C
- 10201 Sensitiveness of high explo-
sives; progress reports by
J. G. Fox, W. S. Koski, R.
W. Lawrence, J. E. Myers and
J. M. Downard. Mar. 23,
1943-Feb. 28, 1946. OSRD
nos. 1288, 3991, 4962, 5632,
6627. C
- 10202 Sensitiveness of high explo-
sives to rifle bullets; con-
densed report by R. W. Law-
rence and J. E. Myers.
[1943] C
- HERCULES POWDER COMPANY, Wilming-
ton, Del. OEMsr-859
Project NS-125.
- 10203 [Explosive streamers] final
report by C. H. Cordic. C
Dec. 29, 1942.
- INDIANA UNIVERSITY, Bloomington,
Ind. OEMsr-701
Projects NO-B10, NO-135, OD-
8, OD-12.
- 10204 DINA and related compounds;
final report by R. L. Shriner.
Aug. 7, 1945. OSRD-
5156. C
- 10205 Analysis of HMX-RDX mix-
tures, by R. L. Shriner and
William Arendshorst, jr.
Feb. 15, Mar. 10 and Apr.
10, 1943. Title varies. C
- 10206 Color reactions of RDX, HMX
and TNT and the preparation
of various nitramines; prog-
ress report by Ralph L.
Shriner. Nov. 25, 1943.
OSRD 2054. C
- 10208 DINA, progress reports by R.
L. Shriner. Aug. 10, 1944-
Feb. 10, 1945. C
- 10209 Nitramines, progress re-
ports. May 10, 1943-May 10,
1944. Color reactions of
HMX and RDX. May 10, 1943.
C
- 10210 [Preliminary studies on the
solubility of RDX and HMX at
22°] by R. L. Shriner and
William Arendshorst. Dec.
15, 1942. C
- 10211 I. The preparation of sta-
bilizers. II. The nitration
of sym-diphenylguanidine,
progress report by Ralph L.
Shriner. Mar. 1, 1945. C

10212 The solubility method, by
Ralph L. Shriner and William
Arendshorst, jr. [Aug. 14,
1943] C

10213 Studies on DINA, by R. L.
Shriner. June 10 and July
10, 1944. C

10214 Studies on nitramines, by
R. L. Shriner and William
Arendshorst, jr. [June 15,
1943-Mar. 15, 1944] Title
varies. C

10215 Studies on RDX and HMX;
progress report by R. L.
Shriner and William Arends-
horst, jr. Jan. 15, 1943. C

10216 A survey of nitramines and
nitramides; preparations,
properties, reactions and
references, by William
Arendshorst, jr. and R. L.
Shriner. Feb. 1, 1944. R

INSTITUTE FOR ADVANCED STUDY,
Princeton, N. J. OEMsr-218
Projects OD-02, OD-03.

10220 [Study of shock waves] by
John von Neumann. Mar. 14-
Aug. 15, 1942. R

IOWA STATE COLLEGE, Ames, Iowa
NDCrc-19
Project OD-1.

10222 Nitration of furan and of
its derivatives and related
substances; final report by
Henry Gilman, H. L. Yale and
H. B. Willis. May 1941. C

10223 The nitration of furans; fi-
nal report by Henry Gilman.
Jan. 28, 1942. B-172. C
OSRD 350.

JOHNS HOPKINS UNIVERSITY, Balti-
more, Md. OEMsr-773
Projects AN-1, NO-144, OD-
02, OD-03, OD-04.

10225 Memoranda of work done on
theory and operation of cav-
ity charges; final report by
R. W. Wood. [1945] C

J. P. SERIES (Jet Propulsion).

10226 Propellants for special jet
propulsion devices; interim
reports compiled by Howard
J. Fisher. Sept. 15, 1944-
Aug. 15, 1945. Report nos.
JP-(1-12).

MASSACHUSETTS INSTITUTE OF TECHNOL-
OGY, Cambridge, Mass.
NDCrc-12
Project OD-13.

10228 Report of the studies on the
reaction of mercuric nitrate
with naphthalene, by T. L.
Davis and M. A. Smith. June
30, 1941. R

MELLON INSTITUTE LABORATORY

- METAL AND THERMIT CORPORATION,
Rahway, N. J. OEMsr-1226
Projects NO-151, OD-01, OD-
04, OD-1, OD-151, OD-159.
- 10231 Tracer and igniter composi-
tions; final report. Jan.
15, 1946. OSRD 6581. C
- 10232 [Igniters and tracers] by S.
Ricklin and H. Hirschland.
Apr. 15 and May 18, 1944. C
- 10233 Review of igniter and tracer
compositions, by H. Hirsch-
land and Saul Ricklin. R-
79, Mar. 18, 1944. OSRD-
3498, Apr. 21, 1944. C
- 10234 Tracer compositions, by L.
T. Work, H. Hirschland, S.
Ricklin and W. Dunham.
[Apr. 15, 1944-Aug. 15,
1945] C
- UNIVERSITY OF MICHIGAN, Ann Arbor,
Mich. NDCrc-21
Projects OD-5, OD-6, OD-12.
- 10236 The preparation of Cyclo-
nite; progress report by
Werner E. Bachmann, Frank
C. Whitmore and Walter R.
Kirner. Jan. 17, 1941. B-
2. OSRD 65. C
- UNIVERSITY OF MICHIGAN, Ann Arbor,
Mich. NDCrc-87
Project OD-12.
- 10238 [Preparation of Cyclonite]
progress report by W. E.
Bachmann. Mar. 15, 1942. C
- 10239 The preparation of Cyclonite
using hexamine, by W. E.
Bachmann. Jan. 30, 1942. C
- UNIVERSITY OF MICHIGAN, Ann Arbor,
Mich. OEMsr-245
Projects NO-117, OD-5, OD-6,
OD-12, OD-68.
- 10241 Studies on RDX (B) and re-
lated compounds; final re-
port by Werner E. Bachmann,
Edward L. Jenner, Lawrence
B. Scott and Norman C. Deno.
June 9, 1945. OSRD 5186. C
- 10242 Abstract of work done at the
University of Michigan, by
W. E. Bachmann. Jan. 15,
1942. C
- 10243 Experiments on RDX, PHX and
HMX, by W. E. Bachmann and
E. L. Jenner. Jan. 15,
1943. Report no. 104. C
- 10244 The hydrolysis method for
samples rich in HMX, by Wer-
ner E. Bachmann, E. L. Jen-
ner and L. B. Scott. [Aug.
14, 1943] C
- 10245 The impact sensitivity of
HMX and of RDX-HMX mixtures,
by Werner E. Bachmann, Al-
fred T. Blomquist, Leo G.
Davy, Duncan P. MacDougall
and Frank C. Whitmore.
Sept. 5, 1944. OSRD 4099. C

- 10246 Investigation of the catalytic conversion of benzene to DNP, by W. E. Bachmann. [Jan. 15-Nov. 15, 1943] The oxynitration of benzene. [Feb. 15 and Mar. 15, 1943] C
- 10247 The oxynitration of benzene: the preparation of 2,4-dinitrophenol and picric acid, by W. E. Bachmann, J. M. Chemerda, N. C. Deno and E. L. Jenner. Jan. 15, Feb. 15 and Mar. 15, 1943. Interim report nos. 103, 105, 107. C
- 10248 The oxynitration of benzene to dinitrophenol, by W. E. Bachmann, J. M. Chemerda, N. C. Deno and E. C. Horning. July 15-Nov. 15, 1943. Interim report nos. 115, 117, 119, 121, 123. C
- 10249 The oxynitration of benzene to dinitrophenol and picric acid, by W. E. Bachmann, J. M. Chemerda, N. C. Deno and E. C. Horning. Apr. 15, May 15 and June 15, 1943. Interim report nos. 109, 111, 113. C
- 10252 Preparation of cyclonite; progress reports by W. E. Bachmann Dec. 19, 1941, Mar. 21 and Apr. 18, 1942. C
- 10254 The preparation of ethylenediurethane by a continuous process, progress report by W. E. Bachmann. Sept. 15, 1942. C
- 10255 Preparation of HMX, by W. E. Bachmann, E. L. Jenner and L. B. Scott. Apr. 15, 1943. Interim report no. 110. C
- 10257 The preparation of RDX; progress report by W. E. Bachmann. Sept. 15, 1942. C
- 10258 RDX; progress reports by W. E. Bachmann, E. L. Jenner, L. B. Scott and N. C. Deno. June 24 and July 15, 1942. Report no. 106, Feb. 15, 1943. Studies on HMX and H-2. Mar 15, 1943. Report no. 108. C
- 10259 The recovery of acetic acid in the combination method for the preparation of cyclonite; progress report by W. E. Bachmann. Dec. 1, 1941. C
- 10260 The sensitivity of RDX; progress report by W. E. Bachmann. May 12, 1942. C
- 10261 [Studies on RDX] by W. E. Bachmann. Oct. 15, 1942. C
- 10262 Studies on RDX and HMX, by W. E. Bachmann, E. L. Jenner and L. B. Scott. May 15-Nov. 15, 1943. Interim report nos. 112, 114, 116, 118. C
- 10263 Studies on RDX and related compounds, by W. E. Bachmann, E. L. Jenner, L. B. Scott and N. C. Deno. Jan. 15, 1944. Interim report no. 122. C

- 10264 Studies on RDX (B), by W. E. Bachmann, E. L. Jenner and L. B. Scott. Dec. 15, 1943-Oct. 15, 1944. Interim report nos. 120, 124, 126, 128, 130, 132, 134, 136, 138, 140. Title varies. C
- 10265 Studies on RDX; RDX formation, by W. E. Bachmann. Nov. 15, 1942. C
- 10267 Studies on the preparation of DPT, HMX, and PHX, by W. E. Bachmann, E. L. Jenner, J. M. Chemerda and N. C. De-no. Dec. 15, 1942. Report no. 102. C

Kingsport, Tenn. OEMsr-393
Project OD-12.

10419 RDX experimentation; [final report] by F. R. Conklin, D. C. Hull, Lee G. Davy, R. C. Burton and E. G. Guenther. Oct. 30, 1942. B-412. OSRD 958. 2 vols. C

10420 Acid recovery and RDX semi-works development; letter by R. G. Stone. Feb. 24, 1942. C

10421 The control of the rate of flow of the ammonium nitrate-nitric acid solution by conductivity measurements, by J. G. Aston. Apr. 21, 1942. C

10422 Design of semi-works plant for primary distillation and subsequent dehydration of special crude acid; progress report no. 3 by C. C. Hyatt, jr. Jan. 14, 1942. C

10423 Log report of laboratory experimental work and pilot plant construction on acid recovery, by F. R. Conklin. Mar. 7, 1942. C

10424 Log report of pilot plant construction, experimental work and pilot plant operation and process improvement on the production of RDX, by F. R. Conklin. [Mar. 7, 1942] C

A CATALOG OF OSRD REPORTS

DIVISION 8

VANDERBILT UNIVERSITY, Nashville,
Tenn. OEMsr-790
Projects OD-6, OD-12.

10441 Analysis of RDX - HMX mix-
tures; report nos. 3-5 by
James Cason and Franklin S.
Prout. Dec. 14, 1942-Apr.
15, 1943. C

10442 Destruction of RDX and HMX
by hydrolysis; report no. 2
by James Cason and Franklin
S. Prout. Jan. 15, 1943. C

10443 Hydrolysis method, by James
Cason and Franklin S. Prout.
[Aug. 14, 1943] C

10444 Preferential destruction of
RDX in RDX-HMX mixtures;
report no. 6 by James Cason
and Franklin S. Prout. May
15, 1943. C

10445 Studies on nitramines; re-
port nos. 7-14 by James Ca-
son and Franklin S. Prout.
June 15, 1943-Jan. 15, 1944. C

WESTERN CARTRIDGE COMPANY, East
Alton, Ill. OEMsr-181
Project OD-12.

10447 Operations of the RDX Engi-
neering Laboratory, by A. O.
Franz. Jan. 21 1942. C

10448 RDX pilot plant operations;
quarterly report by A. O.
Franz. Mar. 14, 1942. C

UNIVERSITY OF WISCONSIN, Madison,
Wis. OEMsr-210
Projects OD-05, OD-44.

10451 Accelerants for the gelati-
nization of nitrocellulose,
by J. W. Williams. [Oct.
15, 1942] C

10452 [Fractionation of nitrocell-
ulose] monthly progress re-
ports by J. W. Williams and
R. Owen Carter. Jan. 15,
1942-Feb. 15, 1944. C

10455 Solvent removal from smoke-
less powders, by J. W. Wil-
liams. [Oct. 15, 1943] C

UNIVERSITY OF WISCONSIN, Madison,
Wis. OEMsr-1040
Projects NO-33, OD-01, OD-
118.

10456 Polarographic investigation
of single base powders; fi-
nal report. Jan. 15, 1946.
OSRD 5751. C

10457 The empirical determination
of the extent of nitrosation
or nitration of diphenyla-
mine and single base powders
by means of the polarograph;
monthly progress report by
Villiers W. Meloche. Apr.
15, 1945. C

10458 Further study of transforma-
tion products of diphenyla-
mine; monthly progress re-
port by Villiers W. Meloche.
May 15, 1944. C

DIVISION 8

A CATALOG OF OSRD REPORTS

- 10459 The polarographic characteristics of the nitrosation-nitration products of diphenylamine, by Villiers W. Meloche. Feb. 15, 1945. C
- 10460 Polarographic examination of nitrates; monthly progress reports by Villiers W. Meloche and Joseph Guffy. Sept. 15, 1943-[Feb. 15, 1944] Title varies. C
- 10461 Polarographic examination of nitro cellulose; monthly progress report by Villiers W. Meloche and Joseph Guffy. Aug. 15, 1943. C
- 10462 Polarographic examination of stabilizers, by V. W. Meloche. [Feb. 15 and Apr. 15, 1945] C
- 10463 [Polarographic investigation of powders] monthly progress reports by Villiers W. Meloche and J. Guffy. Jan. 15-Nov. 15, 1944. C
- 10464 Progress on an attempt to relate an empirical estimation of the nitrosation or nitration of DPA to the relative stability of PYRO; monthly progress report by Villiers W. Meloche. Jan. 15, 1945. C
- 10465 Transformation products of diphenylamine; monthly progress report by Villiers W. Meloche. June 15, 1944. C

- 10466 Transformation products of DPA and relation to stability of single base powder (Pyro); monthly progress report by Villiers W. Meloche. Mar. 15, 1945. C

DIVISION AND MISCELLANEOUS

See also Division 2, Division and Miscellaneous.

- 10467 The analysis of RDX-HMX mixtures; final report by Ralph A. Connor, James Cason, Ralph L. Shriner, Frank C. Whitmore and Werner E. Bachmann. Aug. 14, 1943. OSRD-1711. C
- 10469 Abstracts of Division 8 reports on explosives and other subjects related to armor and ordnance. Mar. 6, 1945. A-317. OSRD 4766. C
- 10470 Bibliography of OSRD reports issued by Division 8. Apr. 19, 1946. OSRD 6630. C
- 10473 Demobilization program. Aug. 10, 1945. C
- 10474 DINA and related compounds, by Alfred T. Blomquist. June 9, 1945. OSRD 5155. C
- 10476 Effect of varying the ratio of nitric acid and of acetic anhydride to hexamine. Effect of water in nitric acid-ammonium nitrate solutions. [194-] R
